Description

Hungarian Cleaning-technology Association (MATISZ) is a professional association in the classical means. It provides professional rights protection, coordination, professional representation for companies dealing in cleaning (cleaning-technology). During the basic duties of the association it will take part in: • Working out and carrying out professional policies. • With the help of its constant newsletters and webpage - www.matisz.org - it informs the profession of cleaning-technology and partners about changes concerning them, and about novices of technology. • It creates a forum for exchange of opinions. • It aims for building a wide range of connection with other professional, civil and industrial individuals. • It concerns its main aim to raise the level of profession and professional education. • The cleaning-technolog expert team of the association helps facility owners, facility managers and property owners as well. MATISZ regularly organises roundtable discussions and conferences, as well as bi-annual trade shows. The first such exhibition (TisztaShow, or CleanShow) was held in 2016. About 40 exhibitors demonstrated the latest developments in the sector in a hall of 4,000 square metres. In addition, the annual “Big Cleaning Day” is organised as a charity events where volunteers help clean facilities the managers of which lack the funds or expertise to do so.
